Magnetized Back

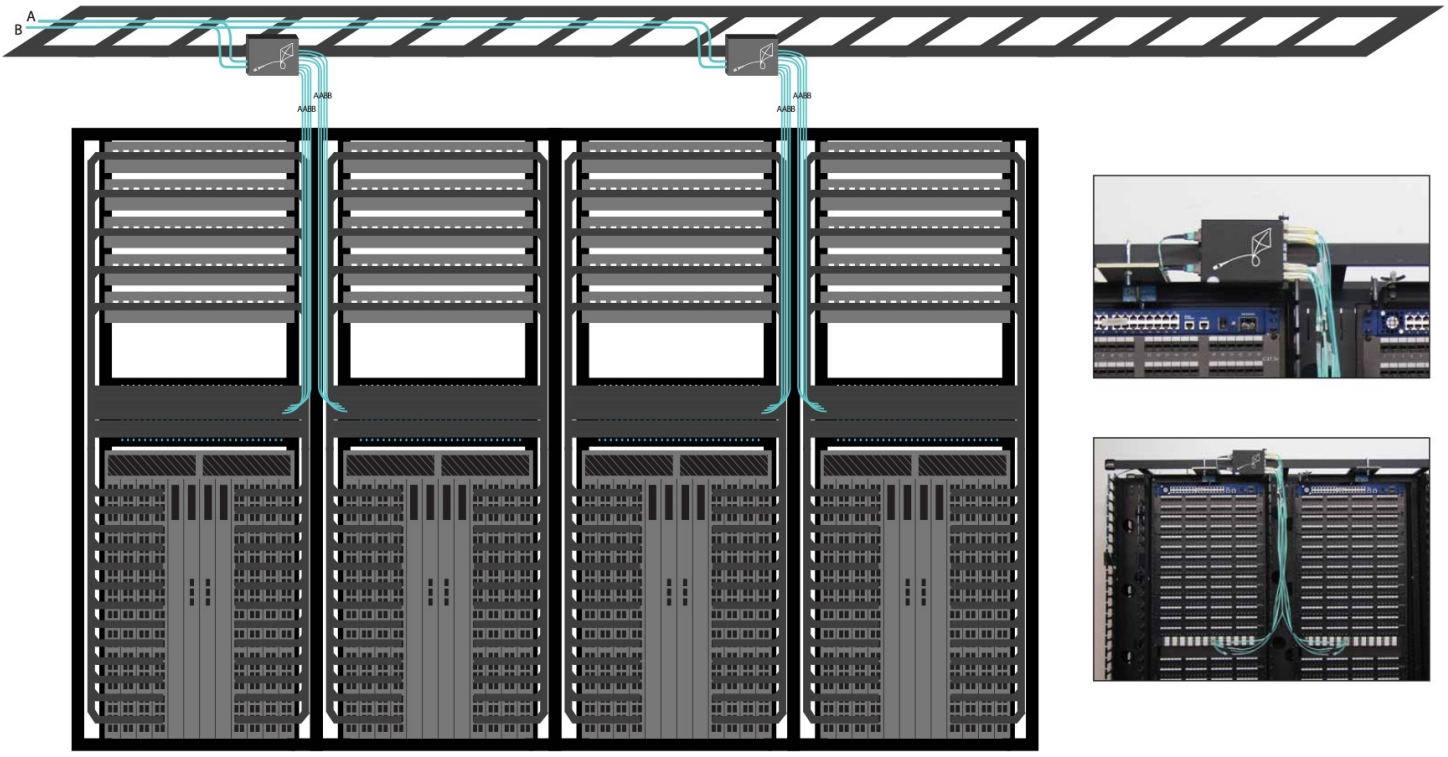

KITE™ Solution in the Data Center

- Flexibility from the rack to the bench

Data Center Design

Connect to any metal location on the rack magnets

EVO™ cassette slides in KITE™ Sleeve

Built-in wire manager

EVO™ Cassettes

Wave2Wave's EVO Cassettes is the smallest high-density cassette in the industry. As technology is quickly evolving to the 40G, 100G and 120G in the data center applications, Wave2Wave offers the technology and a plug & play solution to simplify the field deployment.
